Summary

Product-focused Frontend Engineer with 1.5+ years of experience building scalable, user-centric web applications. Skilled in translating business requirements into performant UI features, optimizing frontend architecture, and delivering measurable improvements in speed, engagement, and usability. Strong foundation in React, TypeScript, and modern frontend tooling with exposure to automation and data-driven systems.

Skills

Frontend Engineering: React, JavaScript, TypeScript, Redux, Zustand, Tailwind CSS, Shadcn UI, HTML5, CSS3

Programming & Automation: Python, Java, C, C++

Data & ML (Foundational): Pandas, NumPy, Scikit-learn

Databases: MySQL, MongoDB

Practices: Component-driven development, Performance optimization, SDLC, Agile

Testing: Functional Testing, Regression Testing

Experience

Frontend Engineer

OneSoul Pvt. Limited

(Dec 2024 – Present)

- Built and shipped user-facing features for 5 design-led web products, ensuring responsive UI and consistent cross-device experience.
- Improved page load performance by ~40–50% through code optimization and frontend best practices.
- Delivered UI enhancements that increased user engagement by ~30% and improved retention.
- Collaborated with designers and stakeholders to translate product requirements into scalable frontend components.

Web Developer | Automation Engineer OSR Web Services (Jul 2024 – Dec 2024)

- Developed responsive frontend interfaces using React, JavaScript, HTML, and CSS.
- Built a Python-based automation system processing 1,000+ domain records from Google Sheets.
- Reduced manual effort by 70% and improved processing performance by 35% through modular architecture.

Projects

Groww Platform Clone (React)

- Built a responsive clone of the Groww investment platform using React and React Router.
- Implemented dynamic navigation, mega menus, and route-based pages simulating real-world flows.
- Focused on reusable components and clean state management for scalability.

Loan Prediction System

- Developed a machine learning model using Python and Scikit-learn with 92% accuracy.
- Performed data preprocessing and feature engineering using Pandas and NumPy.
- Deployed via Flask API to simulate production-ready frontend–backend integration.

Education

Bachelor of Engineering – VESIT (CGPA: 7.15) | Sep 2020 – May 2023

Diploma in Computer Engineering – VESP Chembur (86.8%) | Aug 2017 – Jul 2020

Achievements & Certifications

- 2nd Prize – Technical Paper Presentation (VESP Engineer's Day)
- React.js Certification
- Maharashtra Technical & Self-Employment Training Society – Web Development
- Publicity Incharge – Quest IT Cell, VESIT
